USDA TO COLLECT FINAL 2021 CROP PRODUCTION AND STOCKS DATA

Baton Rouge, LA – As the 2021 growing season officially comes to an end, the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will contact producers nationwide to gather final year-end crop production numbers and the amount of grain and oilseed stored on their farms. At the same time, NASS will survey grain facility operators to determine year-end grain and oilseed stocks.

“These surveys are the largest and most important year-end surveys conducted by NASS,” explained NASS’ Louisiana State Statistician Kathy Broussard. “They are the basis for the official USDA estimates of production and harvested acres of all major agricultural commodities in the United States and year-end grain and oilseed supplies. Data from the survey will benefit farmers and processors by providing timely and accurate information to help them make crucial year-end business decisions and begin planning for the next growing and marketing season.”

The information will be compiled, analyzed, and then published in a series of USDA reports, including the *Crop Production Annual Summary* and quarterly *Grain Stocks* and *Rice Stocks* reports.

“Responses to the producer survey will be included in calculating state and parish yields,” explained Broussard. “This is a farmer’s only opportunity to be included in the calculation used for Louisiana parish yields.”

As with all NASS surveys, information provided by respondents is confidential, as required by federal law. NASS safeguards the privacy of all responses and publishes only aggregate data, ensuring that no individual operation or producer can be identified. These and all NASS reports are available online at www.nass.usda.gov. For more information, call the NASS Delta Regional Field Office at (800) 327-2970.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
